

## Diammonium Phosphate (DAP)

### Specification

<b>Grade - N:P = 17:46</b>	
<b>Product Info:</b>	Granulated Material
<b>Packing:</b>	50kgs Polyethylene Bags (PE) with Polyethylene (PE) inserts
<b>Applications:</b>	This granulated phosphate-nitrogen fertilizer is used for all plants and on all kinds of soils, speeds up plants growth and blossoming.
Characteristics	Standard
Percentage by weight, %	
Digestible Phosphates, as P <sub>2</sub> O <sub>5</sub> , min	46
Total Nitrogen, min	17
Water, max	1,8
Static strength of granules, MPa (kgf/sm <sup>2</sup> ), min	3 (30)
Granulometric composition Percentage by weight of granules, %	
<1 mm, max	2
1-5 mm, min	93
<6 mm	100
Friability, %	100
<p>The present product is manufactured under controlled conditions established by Quality Control System functioning accordance with requirements ISO 9001: 2000</p> <p>Country of origin - Russia, Ukraine, Kazakhstan. 2006</p>
